

Pick Top Job-to-be-Done

Generate accurate HR reports without manual re-entry.

Pick Top Gain

See employee data and compliance status in one place.

Pick Top Pain

Disconnected systems create delays and rework.

Write Problem Framing Statement

I am: [Describe the key persona experiencing the problem.]

Trying to: [What is this persona trying to achieve or get done?]

But: [What are the problems getting in the way of the persona?]

Because: [What is the root cause of this problem?]

Which makes me feel: [How does the problem impact the persona?]

I am Henry, an HR Director.

I am trying to generate accurate HR reports and keep employee information current.

But disconnected systems, manual entry, and routine questions get in the way.

Because payroll, benefits, and policy data live across separate tools, I spend too much time re-entering data and fixing mistakes.

Which makes me feel behind and unable to focus on strategic HR work.
